LETTER

Hon. Commissioner for Patents

Sir:

Applicant hereby presents the claim status from the last Official Action and the action taken in the Amendment. As this application has grown large, it is believed that this listing will assist in the examination process.

The intent of the Amendment previously filed was to capitalize on subject matter for which there was no rejection. At the same time, an effort to clean up the claims and eliminate means plus function language was undertaken.

Many of the claims can be categorized in groups. All claims reviewed in the Official Action were subject to obviousness type double patenting rejections. These rejections have been obviated by a terminal disclaimer and an abandonment of an application. Of these claims, claims 1-15, 18-23, 26, 34-37, 39-48, 51-53, 56-58, 61-64, 66-69, 73-78, 93-110, 125-133, 137-138, 142-143

were not otherwise rejected and, therefore on the record to date, allowable. The subject matter of these claims has been incorporated into a number of other claims to also provide allowability on the current record. Claims 49, 55, 59, 85 and 86 have specific subject matter from claims currently allowable on the record. Claims 70-72, 80, 83, 88-89, 113-114, 117 and 119-120 were rejected under §112 only and the offending language has been removed. Further, claims 16-17, 32, 38, 50, 55, 79, 81-82, 84, 87, 90-92, 112, 118, 121, 124, 134 and 136 have been cancelled. The following amendments have been made and positions taken responsive to the Official Action on the claims now remaining:

122	102 Kubo	Added: card ... directly in the cell phone
140	103 Tend./Oliver	Reference not prior art
141	103 Tend./Oliver	Reference not prior art
144-150		New

Thus, from the foregoing, allowability on the current record removes all claims from issue with the exception of claim 24-25, 27-31, 33, 60, 65, 111, 115-116, 122, 140-141, 144-150. Additionally, claims 24-25, 33, 65, 140 and 141 were rejected over references filed too late to be prior art. Therefore, a manageable seventeen claims require review, claims 27-31, 60, 111, 115-116, 122 and new claims 144-150. These claims were formulated to include patentable subject matter as well.

Respectfully submitted,
